B.S. Abdur Rahman Crescent Engineering College, which was established in the year 1984 by the Founder Chancellor Alhaj Dr. B.S. Abdur Rahman, has now been upgraded as B.S. Abdur Rahman University. This is the first Muslim Minority Institution which obtained "A" Grade from the National Assessment and Accreditation Council (NAAC) in the very 1st cycle of Accreditation. The University offers undergraduate, postgraduate and doctoral programmes in various disciplines such as Civil Engineering, Mechanical Engineering, Polymer Engineering, Aerospace Engineering, Automobile Engineering, Computer Science Engineering, Information Technology, Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering, Bio-Technology, Molecular Biology & Bio-Chemistry, Microbiology, Genetics & Genomics, Architecture, Islamic Studies, Computer Applications, Mathematics, Physics, Chemistry and Business Administration.

The University is located in the outskirts of Chennai city on the G.S.T. Being adjacent to the Arignar Anna Zoological Park, it is easily accessible by city buses.

About the Workshop

Fuzzy graphs have several applications in branches like Environmental Science, Social Science, Geography, Linguistics etc. and some of the problems in these areas can be better studied using the concept of fuzzy graph structures.

Network analysis is used a lot in social science as a method to present data on complex individual relationships. Graph structures and fuzzy graph structures may help this study by providing provision for different types of relationships and the degree of each relationship respectively.

The purpose of this workshop is to bring together experts and young researchers and provide a platform for discussion of recent advances in Fuzzy graphs and its applications. The workshop is instruction in nature and basic concepts with directions for further research will be discussed in this workshop. Apart from lectures we shall have in-depth discussion on the front-line challenging problems on various topics. It is hoped that these in-depth discussions and lectures by the invited speakers will motivate the young researchers to enter into some of the highly fertile research area in Fuzzy Graph Theory.
